

CONTOUR
SUPPORT SYSTEMS

Contour Support Systems are professional video tripod systems, complete with fluid heads with quick release plates, + a balance platform type slide-load system, that ensures easier and more precise camera balance point adjustment than the sliding camera plate. Camera attachment to the fluid head is fast and safe; the quick release camera plate is protected against accidental slipping with a safety lock.

The fluid head has a reinforced counterbalance system and a drag system which is resistant to temperature changes and allows fine, high quality camera movement in extreme weather conditions, enabling the camera operator to achieve excellent picture quality in the targeted application in an effective way.

The tripods comes in options of 2-stage aluminum or carbon fiber, traditional build (top and middle sections are twin-tubed) with excellent torsion rigidity.

Whether using smaller handheld cameras or heavier broadcast cameras configuration with a studio lens and teleprompter, there is a Contour Support System to meet your production needs.

Technical Specifications

Model	Bowl Size	Supported Weight	Tripod Type	Counter Balance Settings	Steps of Drag	Pan Bars	Quick-Release Plates
CTK15	75mm	1.3-14.7 lbs (.6-6.7 kg)	2 Stage Aluminum	8	4	1	2
CTK20	100mm	2.2-20 lbs (1-9 kg)	2 Stage Aluminum	8	6	1	2
CTK30	100mm	8.36-30.8 lbs (3.8-14 kg)	2 Stage Carbon Fiber	8	6	1	2
CTK44	100mm	19.8-44 lbs (9-20 kg)	2 Stage Carbon Fiber	8	8	2	2
CTK57	100mm	19.8-57 lbs (9-25.8 kg)	2 Stage Carbon Fiber	8	8	2	2
CTK80	150mm	46-79 lbs (20.8-35.8 kg)	2 Stage Carbon Fiber	8	8	2	2
